

Supply Chain Intelligence

Empower Executives with Real-Time Performance Insight

Supply Chain Intelligence empowers executives with real-time performance insight across the extended supply chain and allows continuous, KPI-based supply chain improvement.

Supply Chain Intelligence helps organizations tackle the increased global complexity that touches supply chains. It collects and presents crucial data from all trading partners in easy-to-use, customizable dashboards on a computer or tablet. Supply Chain Intelligence metrics illustrate where performance is weak and where it's strong, allowing executives to make smart strategic decisions.

GT Nexus Supply Chain Intelligence Components

- Supply Chain Visibility Analytics
- Inventory Management Analytics
- Transportation Management Analytics
- Procure-to-Pay Analytics
- Supply Chain Finance Analytics
